

# Installation

Model specific instructions

For:

- Triumph Tiger 1050
- Triumph Tiger 1050 Sport
- Triumph Sprint 1050 ST
- Triumph Sprint 1050 GT

These instructions are a model specific add-on to the general BoosterPlug installation instructions.

The general BoosterPlug installation instructions can be found in the "Downloads" section on the BoosterPlug.com website:

<http://www.boosterplug.com/shop/cms-downloads.html>

## Installation Tips

- Install the BoosterPlug module as per the general installation papers.
- The pictures below should help you locate the AIT sensor where the BoosterPlug is installed.
- Remove the seat (Yellow circle - Picture 1)
- Remove the plastic covers that surrounds the tank on both sides (Yellow circle - Picture 2)
- Lift the rear of the tank slightly to remove the fuel tube, vent tubes, and electrical connectors (Yellow circle - Picture 3)
- Remove the tank
- The red circle will show you the location of the AIT sensor
- Note: The BoosterPlug for the Tiger and the Sprint have a longer cable for the AIT connector than shown on our website—this is just to let you relocate the square BoosterPlug box, as there's not much room under the tank.
