

Installation

Model specific instructions

For:

- Moto Guzzi California Vintage
- Moto Guzzi Bellagio 940

These instructions are a model specific add-on to the general BoosterPlug installation instructions.

The general BoosterPlug installation instructions can be found in the "Downloads" section on the BoosterPlug.com website:

<http://www.boosterplug.com/shop/cms-downloads.html>

Installation Tips

- The pictures below should help you locate the AIT sensor where the BoosterPlug is installed.
- The AIT sensor is found under the gas tank, just in front of the intake snorkel on the left hand side of the bike.
- You must remove or slide the gas tank back to get access to the AIT sensor.
- Install the BoosterPlug module as per the general installation papers.
- You have several choices for the BoosterPlug sensor location, but our favorite place is near the steering head or under the head light. Just stick to the simple rules in the general installation instructions for placing the external sensor, and you'll be fine.
