

Installation

Model specific instructions

For:

- **Triumph Tiger 900 - all versions (2020 and newer)**

These instructions are a model specific add-on to the general BoosterPlug installation instructions.

The general BoosterPlug installation instructions can be found in the "Downloads" section on the BoosterPlug.com website:

<http://www.boosterplug.com/shop/cms-downloads.html>

Installation Tips

- Install the BoosterPlug module as per the general installation papers.
- Remove the seat and the plastic tank covers on both sides of the tank (Yellow arrows - Picture 1)
- Remove the two bolts in the side of the headlight - There is one on each side (Yellow arrow - Picture 2)
- Remove the two tank holding bolts - there is one on each side of the tank (Yellow arrow - Picture 4)
- Lift the rear end of the tank about one inch (2,5 cm) - that will provide sufficient room to reach the AIT sensor in top of the air filter box (Red circle circle - Picture 3)
- Place the BoosterPlug module inside the frame tubes on the right hand side of the bike (Red oval - Picture 4)
- You have several choices for the BoosterPlug sensor location, but our favorite places are near the steering head, under the head light, or next to the airbox snorkel air intake hole.
 - Just stick to the simple rules in the general installation instructions for placing the external sensor, and you'll be fine.
